

Recovery Relief to April Storm Victims From now through June 2014, Drive Savers is offering \$500 off data recovery services to victims of the tornadoes and flooding that occurred in the Eastern U.S., April 2014.

After two days of powerful storms, more than 73 million Americans have experienced extensive damage to personal and business belongings, including computer storage devices. DriveSavers is calling on its extensive network of computer service providers throughout the impacted region to help coordinate efforts.

DriveSavers has nearly 30 years experience in retrieving lost data from damaged devices. Irreplaceable photos, financial records, videos, tax documents, contact lists and other critical information commonly stored on hard drives may be recoverable.

Spintronics Expert Wins Millenium Prize

A scientist, whose discoveries helped shape the storage technology field, is the winner of the 2014 Millennium Technology Prize worth more than \$1 million.

Dr. Stuart Parkin was recognized last week by Technology Academy Finland for developing the spin-valve read head, an essential component in the development of larger capacity hard drives over the last 25 years.

About DriveSavers

DriveSavers is the worldwide leader in data recovery services and provides the fastest, most reliable and only certified secure data recovery service available today. DriveSavers high security services adhere to U.S. Government security protocols to ensure that data is never compromised during the recovery process.

DriveSavers delivers electronic discovery and digital forensic solutions that are legally defensible, repeatable and auditable. Our customized solutions help our customers control costs and manage the collection, processing, review and production of Electronically Stored Information (ESI).

DriveSavers maintains the most technologically advanced Certified ISO Class 5 Cleanroom in the industry and is authorized to open drives by all major storage device manufacturers without voiding the warranty. DriveSavers engineers are certified by all leading encryption software vendors to recover encrypted data from all storage devices and all operating systems. Satisfied customers include: Bank of America, Google, Lucasfilm, NASA, Harvard University, Salvation Army and The Rolling Stones.
